NATIONAL PROGRAM FOR SPORTS DEVELOPMENT AND HIGH PERFORMANC

INTRODUCTION

If you're reading this presentation, it's because you're looking to advance your sports organization. Whether you're an institution or a coalition of clubs, you're seeking a tool capable of supporting, developing, and expanding your vision of sports organization. To achieve this, you aim to establish a new management model that simultaneously promotes the popularization of sports, talent identification, and athletic excellence.

The solutions offered by the Taipa Management System aim to drive, strengthen, and enhance sports management and engineering mechanisms to position your organization on the international high-performance stage. It also promotes the transfer of know-how through an educational movement aimed at transforming the organization into a model to follow in terms of methodological innovation.

The challenges

The issues you encounter in managing your organization include:

- Lack of centralized data
- Slow tracking processes
- Absence of a unified strategy for sports development
- Lack of protocols for identifying your most promising athletes

Proposed solution

Implementation of the Integrated Sports Management System

NATIONAL SPORTS CENSUS

Execution of the SPORTS POPULATION CENSUS for a progressive and adapted organization of the overall sports population

Data Analysis and Sports Guidance

stage involves analyzing the gathered data to identify and position the sports population in relation to the development programs of each federation or institution..

Deployment of Sports Projects

Utilizing the information obtained from data analysis, this stage involves the implementation of specific projects aimed at enhancing sports performance across the country, with a focus on adopting new sports management practices.

Advantages

- Improvement of sports performance at both national and international levels.
- Identification and development of emerging sports talents.
- Increase in participation in sports activities across the population.
- Optimization of financial and human resources allocated to sports.
- Enhancement of the image and reputation of your organization within the sports community.
- Boosting national pride through sports successes in international competitions.
- Strengthening of social fabric and community cohesion through participation in sports activities.

Implementation

PHASE 1

2 months

Collection and analysis of existing data on the sports population within your organization.

PHASE 2

1 month

Initial training for local management officers.
Design and implementation of the national sports census system.

PHASE 3

1 month

Development of algorithms and tools for data analysis and sports guidance.

PHASE 4

1 month

Identification and selection of pilot sports projects for initial deployment.

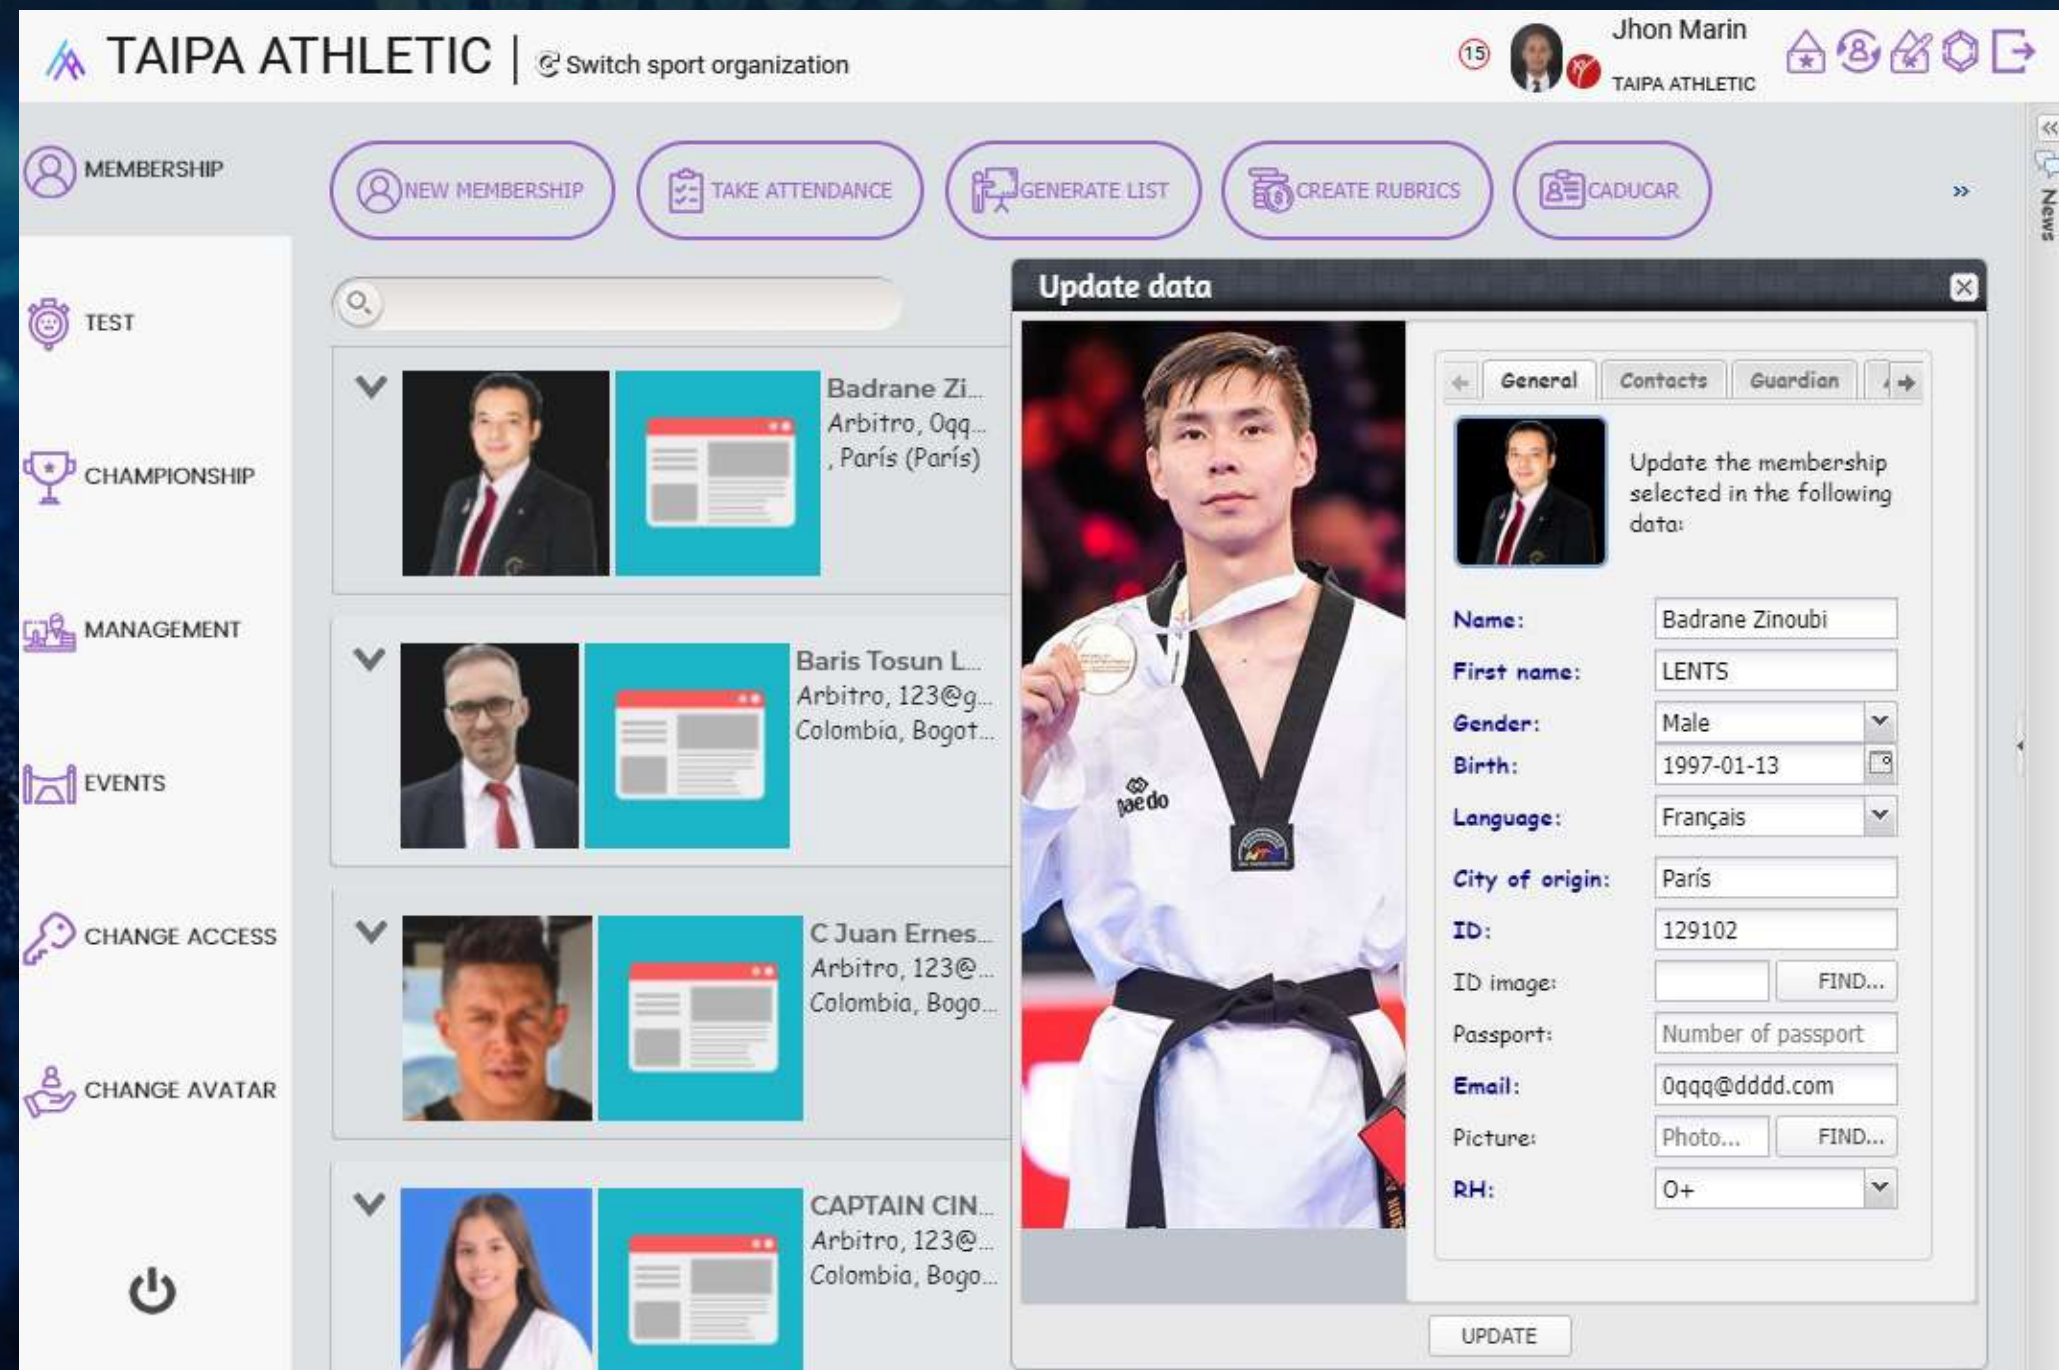

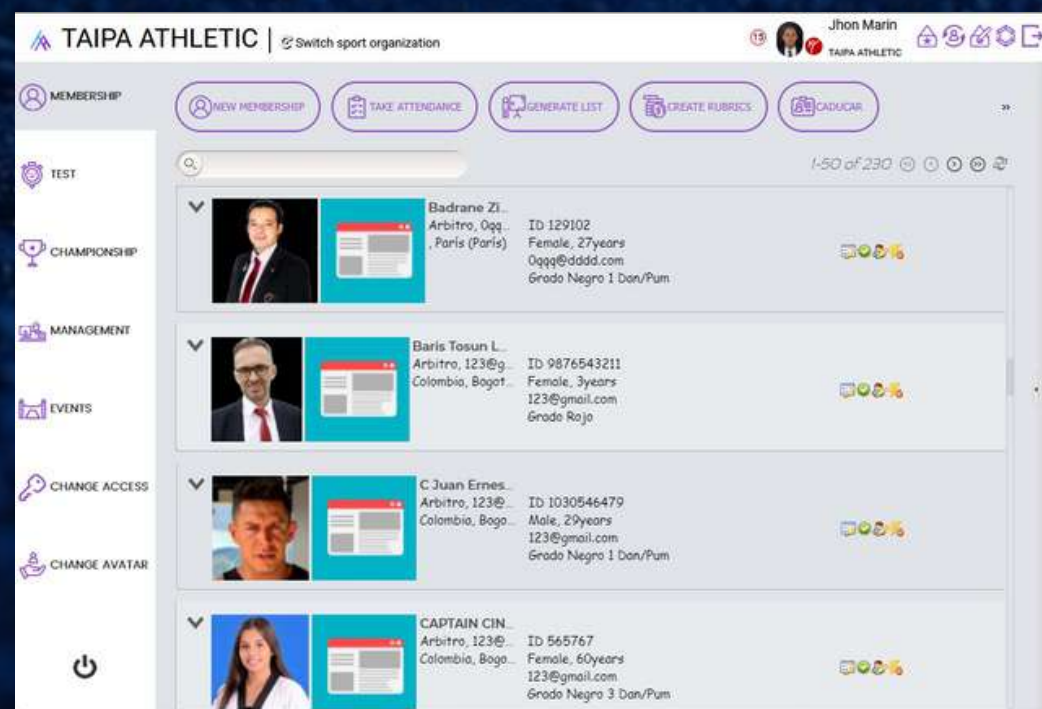

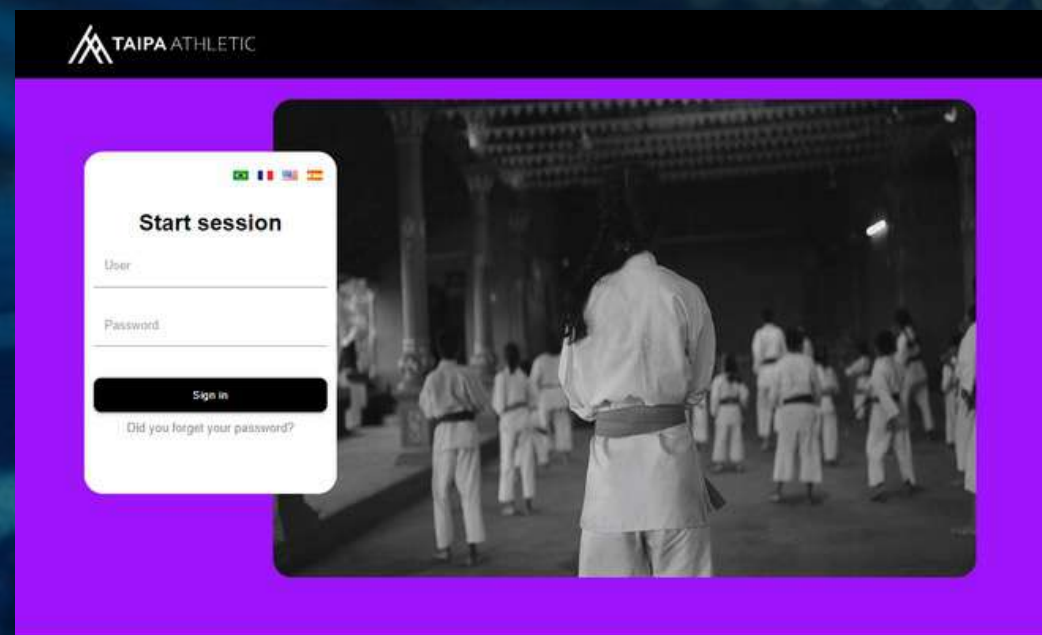

PHASE 5

1 month

Final training for local management officers. Official launch of the sports management system.

The dates are estimates and may vary depending on the availability of resources and cooperation from stakeholders.
